

## PAPER KEY CARDS

ECO FRIENDLY & RESPONSIBLE

### ADVANTAGES

Set your hotel or resort above the competition with our paper RFID cards for secure room access. Meyers has unique capabilities and unrivaled production experience within this industry. Our plant-based cards look and feel premium, plus they work with your existing hardware.

#### EARTH-FRIENDLY

Paper cards are sustainable, making them far more eco-friendly than plastic.

#### COST EFFECTIVE

Our paper cards cost about the same as plastic key cards, creating a rare option to be environmentally friendly without increasing costs.

#### BETTER BRANDING

Meyers' paper cards offer graphic options beyond those supported by plastic, helping your brand stand out.

## THE PROBLEM WITH PLASTIC CARDS

Key cards are one of the few remaining short-term plastic products in use at most hotels. They take 1,000+ years to biodegrade and drive carbon emissions during manufacturing.
